

Occupant Satisfaction Survey Results

Metadata	Details
Document ID	[FM-REP-009]
Version	1.0
Owner	Facilities Management Manager
Effective Date	[Effective Date]
Framework	ISO 41001:2018 Facility Management Management Systems
Classification	Internal Confidential

Purpose

This report presents the results of the Occupant Satisfaction Survey conducted to support the organisation’s Facility Management System (FMS) monitoring, measurement, analysis and evaluation activities under ISO 41001:2018.

The purpose of this report is to:

- Capture the voice of building users regarding facility management services, workplace conditions and service outcomes.
- Evaluate whether facility management performance is meeting user needs, organisational objectives and applicable service level expectations.
- Identify trends, nonconformities, improvement opportunities and areas requiring corrective or preventive action.
- Provide evidence for management review, continual improvement and facility planning decisions.
- Support objective evaluation of occupant satisfaction as a key performance indicator of facility management effectiveness.

This report is intended to provide documented information demonstrating that the organisation has determined what needs to be monitored and measured, selected appropriate methods, analysed results, and evaluated facility management performance in accordance with ISO 41001:2018.

Reporting Period & Scope

Reporting Period

Item	Details
Survey Period	[Survey Start Date] to [Survey End Date]
Reporting Period Covered	[Reporting Period, e.g., Q2 FY2025]
Date of Report Preparation	[Report Date]
Previous Survey Period for Comparison	[Previous Survey Period]
Next Scheduled Survey	[Next Survey Date]

Organisational Scope

This report applies to occupants and regular users of facilities within the scope of the organisation’s ISO 41001:2018 Facility Management System.

Facility / Location	Included in Scope	Occupant Groups Surveyed	Notes
[Head Office / Site A]	Yes	Employees, contractors, visitors where applicable	Main administrative workplace
[Operations Site / Site B]	Yes	Employees, maintenance contractors	Operational workplace
[Regional Office / Site C]	Yes	Employees	Smaller office population
Remote / hybrid workers	Partial	Employees using facilities periodically	Survey questions limited to facility interactions
Excluded locations	[Specify]	[Specify]	[Reason for exclusion]

Service Areas Assessed

The survey assessed occupant satisfaction across facility management service areas relevant to building user experience, including:

- Cleanliness and hygiene.
- Building comfort, including temperature, lighting, acoustics and air quality.
- Maintenance responsiveness and issue resolution.
- Safety, security and emergency readiness.
- Workspace suitability and availability.
- Accessibility and inclusivity.
- Reception, front-of-house and visitor support.
- Waste management and sustainability practices.
- Communication of facility works, disruptions and service updates.
- Overall satisfaction with facility management services.

Limitations

The following limitations should be considered when interpreting results:

- Survey responses reflect occupant perceptions during the reporting period and may be affected by recent service events or disruptions.
- Results are dependent on response rates from each facility and occupant group.
- Some facilities had smaller respondent populations, which may affect statistical confidence.
- Open-text comments were reviewed for themes and risks but may not represent all occupants.
- Results should be considered alongside other monitoring data, including helpdesk performance, planned preventive maintenance completion, incident records, inspection findings and service provider performance reports.

Executive Summary

The Occupant Satisfaction Survey achieved an overall satisfaction score of **[Overall Satisfaction Score]%**, compared with the target of **[Target Satisfaction Score]%** and the previous period result of **[Previous Score]%**. The survey indicates that occupants are generally satisfied with core facility services, particularly cleanliness, reception support and perceived safety. However, lower satisfaction was recorded in relation to temperature

control, communication of works and maintenance response times in selected locations.

The survey generated **[Number of Responses]** valid responses from an estimated occupant population of **[Occupant Population]**, representing a response rate of **[Response Rate]%**. This response rate is considered **[adequate / below target / strong]** for evaluation purposes against the FMS monitoring plan.

Summary of Key Results

Measure	Current Result	Target / Threshold	Previous Result	Status
Overall occupant satisfaction	[Score]%	[Target]%	[Previous Score]%	[Met / Not Met]
Response rate	[Response Rate]%	[Target Response Rate]%	[Previous Response Rate]%	[Met / Not Met]
Cleanliness and hygiene satisfaction	[Score]%	[Target]%	[Previous Score]%	[Met / Not Met]
Maintenance responsiveness satisfaction	[Score]%	[Target]%	[Previous Score]%	[Met / Not Met]
Building comfort satisfaction	[Score]%	[Target]%	[Previous Score]%	[Met / Not Met]
Safety and security satisfaction	[Score]%	[Target]%	[Previous Score]%	[Met / Not Met]
Communication satisfaction	[Score]%	[Target]%	[Previous Score]%	[Met / Not Met]
Net promoter-style workplace recommendation score	[Score]	[Target]	[Previous Score]	[Met / Not Met]

Key Strengths

The survey identified the following strengths:

- Occupants reported high confidence in general building safety and security arrangements.
- Cleanliness standards were rated positively across most sites.
- Reception and visitor management services received consistently favourable feedback.
- Occupants recognised improvements in waste segregation and availability of recycling points.
- Recent upgrades to selected meeting rooms and collaboration spaces were positively received.

Key Areas Requiring Attention

The survey identified the following issues requiring management attention:

- Temperature variability and thermal discomfort in [Site / Building / Floor].
- Delays in closing maintenance requests or providing progress updates.
- Inconsistent communication regarding planned maintenance, access restrictions and disruptive works.
- Limited availability of quiet work areas during peak occupancy periods.
- Perceived gaps in accessibility for occupants with specific mobility or ergonomic needs.

Overall Evaluation

Based on survey results and supporting facility performance data, occupant satisfaction is assessed as **[satisfactory / partially satisfactory / requiring improvement]** for the reporting period. The FMS is generally achieving intended outcomes; however, targeted corrective and improvement actions are required to address service consistency, communication and comfort-related issues.

Methodology

Survey Design

The survey was designed to measure occupant satisfaction with facility management services and workplace conditions within the scope of the ISO 41001 Facility Management System. The survey questions were aligned to the organisation’s facility management objectives, service level expectations and monitoring requirements under.

Survey questions were grouped into service categories and used a combination of:

- Five-point Likert scale questions.
- Yes / no questions for specific service availability or awareness.
- Multiple-choice questions for facility usage patterns.
- Open-text questions to capture qualitative feedback and improvement suggestions.
- Optional demographic or location identifiers to support trend analysis without unnecessary personal data collection.

Rating Scale

Rating	Description	Scoring Value
5	Very satisfied / strongly agree	100%
4	Satisfied / agree	75%
3	Neutral / neither agree nor disagree	50%
2	Dissatisfied / disagree	25%
1	Very dissatisfied / strongly disagree	0%
N/A	Not applicable / no experience	Excluded from score calculation

Survey Distribution

Item	Method
Survey platform	[Survey Tool / System]
Distribution channel	Email invitation, intranet notice and QR code posters in common areas
Eligible respondents	Occupants and regular users of in-scope facilities
Response method	Anonymous online submission
Reminder frequency	[Number] reminders during survey period
Accessibility provisions	Screen-reader compatible form and alternative format available on request
Language availability	[Languages]

Participation Metrics

Facility / Location	Estimated Occupant Population	Valid Responses	Response Rate	Minimum Target Response Rate	Status
[Site A]	[Number]	[Number]	[Rate]%	[Target]%	[Met / Not Met]
[Site B]	[Number]	[Number]	[Rate]%	[Target]%	[Met / Not Met]
[Site C]	[Number]	[Number]	[Rate]%	[Target]%	[Met / Not Met]
Total	[Number]	[Number]	[Rate]%	[Target]%	[Met / Not Met]

Data Quality Controls

The following controls were applied to support reliability and integrity of survey results:

- Duplicate submissions were identified and removed where technically feasible.
- Incomplete responses were excluded where fewer than [Threshold]% of mandatory questions were answered.
- “Not applicable” responses were excluded from satisfaction score calculations.
- Open-text responses were reviewed to identify recurring themes, risks and improvement opportunities.
- Responses were aggregated to preserve anonymity and avoid attribution to individual occupants.
- Results were compared with prior-period survey data and operational performance metrics where available.
- Survey data was retained as documented information in accordance with the organisation’s document retention requirements.

Evaluation Criteria

Survey results were evaluated against the following criteria:

Evaluation Area	Target / Threshold	Source
Overall occupant satisfaction	≥ [Target]%	FM objectives and KPI register
Response rate	≥ [Target]%	FMS monitoring plan
Service category satisfaction	≥ [Target]% per category	FM service performance framework
Critical safety-related dissatisfaction	Escalation if > [Threshold]% dissatisfied	Risk management criteria
Negative trend from prior period	Escalation if decline > [Threshold] percentage points	Management review criteria
Repeated issue theme	Action required where theme appears in ≥ [Threshold] comments or across multiple sites	Corrective action process

Detailed Findings / Results (with structure)

1. Overall Satisfaction

Measure	Current Period	Previous Period	Change	Target	Status
Overall satisfaction with facilities	[Score]%	[Score]%	[Increase / Decrease] [X] pp	[Target]%	[Met / Not Met]
Satisfaction with FM services overall	[Score]%	[Score]%	[Increase / Decrease] [X] pp	[Target]%	[Met / Not Met]
Workplace supports productivity	[Score]%	[Score]%	[Increase / Decrease] [X] pp	[Target]%	[Met / Not Met]
Would recommend workplace environment	[Score]	[Score]	[Increase / Decrease] [X]	[Target]	[Met / Not Met]

Occupants generally rated the facilities as **[positive / mixed / below expectation]**. Positive feedback focused on cleanliness, safety and location convenience. Negative feedback focused on comfort consistency, issue resolution and communication.

2. Cleanliness and Hygiene

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
Work areas are clean and well maintained	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Washrooms are clean, stocked and functional	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
Kitchens / break areas are clean and usable	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Waste bins are emptied at appropriate frequency	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Hygiene supplies are consistently available	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Key Findings

- Cleaning standards were rated above target in [Location / Area].
- Washroom cleanliness improved compared with the previous reporting period following [intervention / contractor review].
- Lower scores were recorded for kitchen and break areas in [Location], primarily due to end-of-day cleanliness and user behaviour.
- Occupants noted occasional shortages of consumables in [Location / Floor].

Representative Themes from Comments

Theme	Frequency	Risk / Impact	Example Issue Type
Kitchen cleanliness	[Number] comments	Reduced user satisfaction and hygiene concerns	Dishes left, bins full, surfaces not wiped
Washroom supplies	[Number] comments	User inconvenience and hygiene impact	Soap or paper towel shortages
Cleaning during peak hours	[Number] comments	Perceived disruption	Cleaning equipment in circulation areas

3. Building Comfort and Indoor Environment

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
Temperature is comfortable during working hours	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Lighting supports work activities	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Noise levels are acceptable	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Air quality is acceptable	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Workspace layout supports work needs	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Key Findings

- Temperature comfort was the lowest-rated service category for the period.
- Feedback indicates temperature inconsistency between [floors / zones / wings].
- Lighting satisfaction remained stable and above threshold in most areas.
- Noise levels were a concern in open-plan workspaces, especially near collaboration zones and circulation routes.
- Air quality concerns were reported in [Location], requiring review alongside HVAC maintenance records.

Comfort Issue Breakdown

Issue Type	Primary Locations	Number of Comments	Severity Assessment	Current Control
Too cold	[Location / Floor]	[Number]	Medium	BMS temperature setpoints
Too warm	[Location / Floor]	[Number]	Medium	HVAC zoning
Noise disruption	[Location / Area]	[Number]	Medium	Meeting room booking and etiquette guidance
Poor air movement / air quality	[Location]	[Number]	Medium / High	Scheduled HVAC servicing
Glare or lighting issue	[Location]	[Number]	Low / Medium	Local blinds and lighting controls

4. Maintenance Responsiveness and Issue Resolution

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
Maintenance issues are easy to report	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Maintenance requests are addressed promptly	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Reported issues are resolved effectively	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Status updates are provided where needed	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Recurring issues are addressed permanently	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Key Findings

- Occupants were generally aware of how to report maintenance issues through [Helpdesk / System].
- Satisfaction with response speed was below target in [Site / Service Area].
- Open comments indicate dissatisfaction where tickets were closed without visible resolution or explanation.
- Recurring issues were reported for [e.g., access doors, lifts, HVAC, meeting room equipment].
- Communication during extended maintenance works was identified as a key improvement area.

Supporting Helpdesk Metrics

Metric	Current Period	Target	Previous Period	Status
Total maintenance requests logged	[Number]	N/A	[Number]	Informational
Average response time	[Time]	[Target Time]	[Time]	[Met / Not Met]
Average resolution time	[Time]	[Target Time]	[Time]	[Met / Not Met]
SLA compliance	[Rate]%	[Target]%	[Rate]%	[Met / Not Met]
Reopened tickets	[Number] / [Rate]%	≤ [Target]%	[Number] / [Rate]%	[Met / Not Met]
Tickets older than SLA	[Number]	≤ [Target]	[Number]	[Met / Not Met]

5. Safety, Security and Emergency Preparedness

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
I feel safe in the building	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Security arrangements are appropriate	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Visitor access is controlled appropriately	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Emergency exits and routes are clear	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
I understand emergency procedures	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Key Findings

- Safety and security remained one of the highest-rated categories.
- Occupants reported positive perceptions of reception screening and access control.
- Awareness of emergency procedures varied by site and by newer occupants.
- Comments identified occasional obstruction of emergency routes in [Location], requiring immediate inspection and corrective action if confirmed.
- Fire warden visibility and emergency communication arrangements require reinforcement in [Site / Floor].

Safety-Related Escalations

Finding	Location	Severity	Immediate Action Required	Responsible Owner
Reported obstruction near emergency route	[Location]	High if confirmed	Conduct inspection and remove obstruction	Facilities Manager
Low awareness of assembly point	[Location]	Medium	Re-communicate emergency procedures	HSE / FM
Access tailgating concern	[Location]	Medium	Review signage and awareness campaign	Security Lead

6. Accessibility, Inclusivity and User Needs

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
Facilities are accessible for my needs	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Ergonomic needs are supported appropriately	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Meeting rooms and shared spaces are accessible	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Facilities support diverse working needs	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Key Findings

- General accessibility satisfaction was **[above / below]** target.
- Several respondents requested improved availability of adjustable desks, ergonomic chairs or assistive equipment.
- Feedback identified challenges accessing [specific area / room type] due to [door weight, layout, signage, booking constraints].
- Quiet rooms, wellness spaces or prayer / reflection spaces were referenced as areas for improvement in qualitative comments.
- Accessibility-related feedback should be reviewed with relevant stakeholders and risk assessed in accordance with applicable legal and organisational obligations.

7. Workspace Availability and Functionality

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
Workstations are available when needed	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Meeting rooms are available when needed	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Collaboration areas meet user needs	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Quiet spaces are available when needed	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Room equipment is reliable and functional	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Key Findings

- Meeting room availability remains a recurring dissatisfaction theme at [Site].
- Quiet workspace availability scored below target, particularly on peak attendance days.
- Occupants reported inconsistent functionality of audio-visual equipment in [rooms / floors].
- Workstation availability was acceptable overall but varied by day of week and business unit.
- Survey comments suggest that occupancy monitoring data should be reviewed alongside booking and utilisation data.

8. Communication and Engagement

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
Facility updates are communicated clearly	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Planned works are communicated with sufficient notice	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Disruptions are explained and managed effectively	[Score]%	[Target]%	[Score]%	[Met / Not Met]
I know how to contact facilities support	[Score]%	[Target]%	[Score]%	[Met / Not Met]
FM considers occupant feedback	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Key Findings

- Communication was below target and declined compared with the previous survey period.
- Occupants requested more advance notice of noisy works, access changes and service outages.
- Some respondents were unaware of the correct channel for lodging facility requests.
- Feedback indicates that occupants value visible closure of survey actions and periodic “you said, we did” updates.
- Communication effectiveness is a material contributor to perceived service quality, particularly where issues cannot be resolved immediately.

9. Sustainability and Environmental Services

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
Recycling and waste facilities are clear and accessible	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Survey Question / Measure	Satisfaction Score	Target	Previous Result	Status
The building supports sustainable behaviours	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Energy-saving measures are communicated appropriately	[Score]%	[Target]%	[Score]%	[Met / Not Met]
Waste segregation instructions are understood	[Score]%	[Target]%	[Score]%	[Met / Not Met]

Key Findings

- Occupants responded positively to visible recycling improvements in [Location].
- Confusion remains regarding which waste streams should be used for specific materials.
- Some comments expressed concern that energy efficiency measures may be affecting thermal comfort.
- Sustainability communications should balance environmental objectives with occupant comfort and operational requirements.

10. Site-Level Comparison

Category	[Site A]	[Site B]	[Site C]	Organisation Average	Lowest Performing Site
Overall satisfaction	[Score]%	[Score]%	[Score]%	[Score]%	[Site]
Cleanliness and hygiene	[Score]%	[Score]%	[Score]%	[Score]%	[Site]
Building comfort	[Score]%	[Score]%	[Score]%	[Score]%	[Site]
Maintenance responsiveness	[Score]%	[Score]%	[Score]%	[Score]%	[Site]
Safety and security	[Score]%	[Score]%	[Score]%	[Score]%	[Site]
Accessibility and inclusivity	[Score]%	[Score]%	[Score]%	[Score]%	[Site]
Workspace functionality	[Score]%	[Score]%	[Score]%	[Score]%	[Site]
Communication	[Score]%	[Score]%	[Score]%	[Score]%	[Site]
Sustainability services	[Score]%	[Score]%	[Score]%	[Score]%	[Site]

11. Open-Text Feedback Themes

Rank	Theme	Number of Mentions	Sentiment	Related Service Area	Action Required
1	Temperature variability	[Number]	Negative	Building comfort / HVAC	Yes
2	Maintenance follow-up	[Number]	Negative	Maintenance	Yes
3	Cleanliness improvements	[Number]	Positive	Cleaning	Monitor
4	Meeting room availability	[Number]	Negative	Workspace	Yes
5	Better communication of works	[Number]	Negative	Communication	Yes
6	Recycling improvements	[Number]	Positive	Sustainability	Monitor
7	Quiet workspace demand	[Number]	Negative	Workspace planning	Yes

12. Nonconformities, Risks and Improvement Opportunities

Type	Description	Evidence Source	ISO 41001 Relevance	Required Response
Potential nonconformity	[Example: Planned works not consistently communicated in accordance with internal FM communication standard]	Survey comments and communication records	evaluation and service performance monitoring	Investigate and raise corrective action if confirmed
Risk	Thermal discomfort may affect occupant wellbeing, productivity and satisfaction	Low comfort scores and HVAC complaints	Facility service outcomes and user needs	Assess HVAC controls and occupancy patterns
Improvement opportunity	Introduce service request status notifications	Maintenance satisfaction results	Monitoring results used for improvement	Evaluate helpdesk workflow enhancement
Improvement opportunity	Publish "you said, we did" update after survey	Communication feedback	Stakeholder engagement and satisfaction monitoring	Implement communication plan
Risk	Low emergency procedure awareness for new occupants	Survey result and onboarding feedback	User safety and facility readiness	Update induction and refresher communication

Analysis

Alignment with ISO 41001:2018

ISO 41001:2018 requires the organisation to determine what needs to be monitored and measured, the methods for monitoring, measurement, analysis and evaluation, when monitoring and measuring shall be performed, and when results shall be analysed and evaluated. This occupant satisfaction survey forms part of the organisation's FMS performance evaluation process and provides evidence of user-focused monitoring.

The survey supports by:

- Measuring occupant satisfaction with facility management service delivery.
- Evaluating whether facilities support organisational needs and user requirements.
- Providing data for trend analysis and management review.
- Identifying service gaps and improvement opportunities.
- Supporting evidence-based decisions for corrective actions, supplier oversight, resource allocation and workplace planning.
- Maintaining documented information as evidence of monitoring, measurement, analysis and evaluation.

Performance Against Objectives

Facility Management Objective	Related Survey Measure	Result	Objective Status	Commentary
Maintain occupant satisfaction at or above target	Overall satisfaction	[Score]%	[Met / Not Met]	[Commentary]
Provide safe, secure and compliant facilities	Safety and security satisfaction	[Score]%	[Met / Not Met]	Strong perception of safety; awareness gaps require attention
Deliver responsive maintenance services	Maintenance responsiveness	[Score]%	[Met / Not Met]	Response and closure communication below expectation
Maintain comfortable and productive workplaces	Building comfort and workspace functionality	[Score]%	[Met / Not Met]	Thermal comfort and quiet space availability are key issues
Improve engagement with building users	Communication and feedback satisfaction	[Score]%	[Met / Not Met]	Communication requires structured improvement
Support sustainability outcomes	Sustainability service satisfaction	[Score]%	[Met / Not Met]	Recycling improvements recognised; guidance still needed

Trend Analysis

The current-period results indicate the following trends:

- Overall satisfaction has **[increased / decreased / remained stable]** compared with the previous reporting period.
- Cleanliness and hygiene performance has **[improved / remained stable]**, likely influenced by [cleaning contract review / revised inspection regime / increased cleaning frequency].
- Building comfort satisfaction has **[declined / remained below target]**, indicating persistent HVAC zoning or workplace density issues.
- Maintenance satisfaction has **[declined / improved]** in relation to response timeliness but remains affected by communication during extended repairs.
- Safety and security satisfaction remains consistently high, although emergency procedure awareness should be reinforced.
- Communication satisfaction has **[declined]**, suggesting that operational changes and planned works are not being communicated consistently or early enough.

Root Cause Considerations

The following likely contributing factors were identified based on survey comments and supporting operational data:

Issue	Likely Contributing Factors	Additional Verification Required
Thermal discomfort	HVAC zoning limitations, setpoint controls, occupancy variation, seasonal changes, local equipment heat loads	Review BMS logs, maintenance records and zone temperature readings
Maintenance dissatisfaction	SLA delays, lack of automated updates, insufficient closure confirmation, contractor dependency	Review helpdesk workflow and ticket ageing data
Poor communication of works	Decentralised communication ownership, inconsistent notice templates, insufficient lead time	Review planned works communication process
Meeting room availability	Peak-day occupancy, block bookings, limited room release discipline, hybrid meeting demand	Review booking data and utilisation patterns
Quiet space shortage	Increased collaborative activity, open-plan density, limited acoustic separation	Conduct workspace utilisation and acoustic assessment
Accessibility concerns	Local layout constraints, equipment availability, limited awareness of adjustment process	Conduct accessibility review with relevant stakeholders

Risk and Impact Assessment

Risk Area	Impact on Facility Management Outcomes	Current Risk Level	Rationale
Occupant wellbeing and productivity	Discomfort and noise may reduce productivity and workplace satisfaction	Medium	Repeated comfort and quiet space feedback
Service performance perception	Poor updates may reduce trust even where work is progressing	Medium	Maintenance communication below target
Safety readiness	Emergency procedure awareness gaps may affect response effectiveness	Medium	Lower awareness among some occupant groups
Compliance and accessibility	Unresolved accessibility issues may create legal, reputational or wellbeing impacts	Medium / High depending on issue	Requires further assessment
Sustainability engagement	Confusing waste arrangements may reduce recycling effectiveness	Low / Medium	Improvement opportunity rather than immediate nonconformity

Evaluation of Data Adequacy

The survey response rate of **[Response Rate]%** is assessed as **[sufficient / partially sufficient / insufficient]** to support evaluation of occupant satisfaction for the reporting period. Results are most reliable for facilities and occupant groups where minimum response thresholds were met. Where response rates were below target, findings should be treated as indicative and supplemented with helpdesk, inspection and occupancy data.

The combination of quantitative scores, qualitative comments and operational metrics provides a reasonable evidence base for management review and improvement planning, subject to further verification of safety, accessibility and comfort-related issues.

Recommendations & Actions

Recommended Management Actions

The following actions are recommended to address survey findings and support continual improvement of the Facility Management System.

Action ID	Recommendation / Action	Priority	Responsible Owner	Due Date	Success Measure	Status
FM-ACT-[001]	Review HVAC performance in low-scoring zones, including BMS data, setpoints, air balancing and recent maintenance records	High	Facilities Manager / Engineering Lead	[Due Date]	Temperature complaints reduced by [Target]% and comfort score improves to $\geq$ [Target]%	Open
FM-ACT-[002]	Implement standard communication template and minimum notice period for planned works and service disruptions	High	Facilities Management Manager	[Due Date]	Communication satisfaction improves by [Target] pp; $\geq$ [Target]% planned works issued within required notice	Open
FM-ACT-[003]	Configure maintenance helpdesk status updates for acknowledged, in-progress, delayed and closed tickets	High	FM Helpdesk Lead / System Owner	[Due Date]	Maintenance communication score improves to $\geq$ [Target]%; reduced reopened tickets	Open
FM-ACT-[004]	Conduct inspection of reported emergency route obstruction and reinforce emergency route housekeeping controls	Immediate	Site Facilities Coordinator / HSE Lead	[Due Date]	Inspection completed; no blocked routes identified in follow-up checks	Open
FM-ACT-[005]	Publish occupant feedback response summary using "you said, we did / we are doing" format	Medium	FM Communications Lead	[Due Date]	Published update; improved perception that FM considers feedback	Open
FM-ACT-[006]	Review meeting room and quiet space utilisation data and propose optimisation measures	Medium	Workplace Planning Lead	[Due Date]	Utilisation report completed; action plan approved	Open

Action ID	Recommendation / Action	Priority	Responsible Owner	Due Date	Success Measure	Status
FM-ACT-[007]	Review accessibility-related comments and complete targeted accessibility assessment for identified areas	High	Facilities Manager / HR / HSE	[Due Date]	Assessment completed; required adjustments tracked to closure	Open
FM-ACT-[008]	Update occupant guidance for waste segregation and recycling points	Low / Medium	Sustainability Lead / FM	[Due Date]	Reduced waste confusion comments; improved sustainability score	Open
FM-ACT-[009]	Reinforce emergency procedure awareness for new and existing occupants	Medium	HSE Lead / FM	[Due Date]	Emergency awareness score improves to $\geq$ [Target]%	Open
FM-ACT-[010]	Review cleaning schedule and user etiquette controls for kitchen and break areas in low-scoring locations	Medium	Cleaning Contract Manager	[Due Date]	Kitchen cleanliness score improves to $\geq$ [Target]%	Open

Corrective Action Requirements

Where findings indicate failure to meet defined service requirements, legal requirements, internal FM standards or FMS objectives, the responsible owner shall determine whether a corrective action record is required under the organisation's nonconformity and corrective action process.

Corrective action shall be considered mandatory where:

- A safety or emergency readiness issue is confirmed.
- A service level failure has occurred repeatedly or materially affected occupants.
- A legal, accessibility, health or compliance requirement may not have been met.
- A defined FM objective or KPI has not been achieved and root cause analysis is required.
- Survey results indicate persistent dissatisfaction across multiple reporting periods.

Follow-Up Monitoring

Progress against actions will be monitored through the following mechanisms:

Monitoring Activity	Frequency	Owner	Evidence
Action tracker review	Monthly until closure	Facilities Management Manager	Updated action log
Maintenance SLA reporting	Monthly	FM Helpdesk Lead	Helpdesk performance report
HVAC comfort issue review	Monthly during affected season	Engineering Lead	BMS data, complaint trends, maintenance records
Safety and emergency route inspection	[Frequency]	HSE / Site FM	Inspection checklist
Planned works communication compliance review	Quarterly	FM Communications Lead	Communication records
Occupant pulse survey on targeted issues	[Frequency]	FM Manager	Survey summary
Management review input	At scheduled FMS management review	FMS Owner	Management review pack

Expected Improvement Outcomes

Successful implementation of the recommended actions is expected to:

- Improve occupant satisfaction with building comfort, maintenance and communication.
- Reduce recurring complaints and improve perceived responsiveness.
- Improve evidence-based decision-making for workplace planning.
- Strengthen compliance with ISO 41001 monitoring, measurement, analysis and evaluation requirements.
- Improve user confidence that facility management listens to and acts on feedback.
- Support continual improvement of the Facility Management System.

Distribution & Confidentiality

Distribution

This report shall be distributed to roles with responsibility for facility management performance, governance, risk, compliance, service delivery and continual improvement.

Recipient / Role	Purpose of Distribution
Executive Sponsor for Facility Management	Oversight of user satisfaction and resource implications
Facilities Management Manager	Accountability for action planning and service improvement
Site Facilities Coordinators	Site-level review and action implementation
HSE Manager	Review of safety, emergency and wellbeing-related findings
Security Lead	Review of security and access-control feedback
Cleaning Contract Manager	Review of cleaning and hygiene findings
Maintenance / Engineering Lead	Review of maintenance and comfort-related findings
Workplace Planning Lead	Review of space utilisation and functionality findings
Sustainability Lead	Review of waste and environmental service feedback
ISO 41001 Management System Representative	Evidence for and management review
Internal Audit / Compliance Function	Assurance and audit evidence
Relevant Service Providers	Limited extracts relevant to contracted services, subject to confidentiality controls

Confidentiality

This report is classified as **Internal Confidential**. It contains aggregated occupant feedback, facility performance information and improvement actions. It shall be handled in accordance with the organisation's information classification, privacy and records management requirements.

The following confidentiality requirements apply:

- Individual respondent identities shall not be disclosed.
- Open-text comments shall be anonymised before broader distribution where there is any risk of identifying individuals.
- Site-level results may be shared with responsible managers for improvement purposes.
- Extracts shared with service providers shall be limited to information necessary for service improvement and contract management.

- The report shall not be distributed externally without approval from the Facilities Management Manager and other required organisational authorities.
- Survey data and supporting analysis shall be retained for the period defined in the FMS documented information retention schedule.
- Any personal data collected during the survey shall be processed in accordance with applicable privacy requirements and the organisation's data protection policies.

Documented Information and Audit Evidence

The following records shall be retained with this report as supporting documented information:

Record	Retention Location	Owner
Final survey questionnaire	[Document Repository / System]	Facilities Management Manager
Survey response dataset, anonymised	[Survey Tool / Repository]	FM Survey Owner
Survey distribution communications	[Email Archive / Repository]	FM Communications Lead
Data analysis workbook / dashboard	[Repository / BI System]	FM Analyst
Action tracker	[Action Management System]	Facilities Management Manager
Supporting operational metrics	[Helpdesk / CAFM / BMS System]	Relevant System Owner
Management review submission	[FMS Repository]	ISO 41001 Management System Representative

This report and associated records provide evidence that occupant satisfaction has been monitored, measured, analysed and evaluated as part of the organisation's ISO 41001:2018 Facility Management System performance evaluation process.
